BUNDIT HIRUNWONGSAWANG

DEVELOPER

ABOUT ME

I graduated in electrical engineering. I am interested in changing job to Developer and want to learn experience to improve my skills.

EDUCATION

Matthayom Watnairong School

King Mongkut's University of Technology North Bangkok

Bachelor of Engineering

- Major in Electrical and Computer Engineering
  GPA : 3.06

GRADUATION PROJECT

Implementation of a Fault Indicator in Existing Low-Tech Load Break Switches

- Design electronic circuit and algorithm for Fault indicator device on ARDUINO MEGA 2560 that can process signals at a sampling rate of 2000Hz with calculating the current, detects overcurrent and works the same as Overcurrent Relay.

  (C, Arduino IDE)

PROJECT

E-commerce (clothing store)

- Build an e-commerce application using React.ts and API to pull products'data , API for signin-signup , using Ant Design table to CRUD products for Admin and have Stripe's payment system.

  (Tailwind CSS , React.ts , Express.js, PostgreSQL ,Stripe , Ant Design , Redux-toolkit)
